

Using Anatomy World in OS X

To watch Anatomy World videos in OS X without the benefit of Windows follow these instructions. Note that this is not a perfect solution; it does not look terrific, but it works and is watchable.

1. Launch **Firefox**.
2. Navigate to this link: <https://addons.mozilla.org/en-US/firefox/addon/1879>
3. This will allow you to install a Firefox plugin called **MediaWrap**.

- 4.
5. Click on **Add to Firefox**.
6. Click on **Install Now**.
7. After it installs, you will be prompted to restart Firefox. Do so.

- 8.
9. Once Firefox has restarted, go to Anatomy World and make sure it works. Videos will not just start playing; you will have to click on a thumbnail to get them started.
10. Anatomy World: <https://casemed.case.edu/AnatomyWorld/>

If you are having trouble getting this to work, come and see us in E318.
