A. Personal Statement
I am currently the Dean of the School of Medicine at Case and the former director of the Willard A. Bernbaum Cystic Fibrosis Research Center. As such, I am responsible for the research and educational activities of the basic science departments of Case and of the clinical departments in all the academic medical centers of the region, all of whom are affiliated with Case for their academic programs and faculty development.

I am a strong supporter of the SDRC under the leadership of Dr. Kevin D. Cooper. Dr. Cooper and the directors of the SDRC Cores bring tangible benefits to the University research community and also benefit from the strong research infrastructure present at the Case SOM. I am also director for the Clinical Translational Science Collaborative (CTSC) at Case. Based upon discussions with Dr. Cooper, the CTSC has committed to a joint P&F process with the SDRC to support a marquee P&F that will spotlight cutaneous research at Case.

The SDRC at Case has institutional support in the form of committed research dollars and in-kind matches that exceed the NIH investment. This Center has had a long and distinguished place in the research infrastructure of Case and I am committed to its' continued success.
