Using Anatomy World in OS X

To watch Anatomy World videos in OS X without the benefit of Windows follow these instructions. Note that this is not a perfect solution; it does not look terrific, but it works and is watchable.

1. Launch Firefox.
2. Navigate to this link: https://addons.mozilla.org/en-US/firefox/addon/1879
3. This will allow you to install a Firefox plugin called MediaWrap.
4. Click on Add to Firefox.
5. Click on Install Now.
6. After it installs, you will be prompted to restart Firefox. Do so.
7. Once Firefox has restarted, go to Anatomy World and make sure it works. Videos will not just start playing; you will have to click on a thumbnail to get them started.

If you are having trouble getting this to work, come and see us in E318.
