Description of Available Subrotations
Core 3 Clinical Neuroscience Clerkship at UH/VA

General Neurology (2 weeks)
*(Team room: Lerner Tower 4, to the left from elevators, behind nursing station)*
Students will see a wide range of neurologic conditions in an inpatient ward setting as well as seeing consults across the hospital. The student will act as part of a team consisting of an attending, senior and junior neurology residents, and junior non-neurology residents.

General Neurology at VA Hospital (4 weeks)
*(Team room: VA main elevators, 5th floor, Room 5A-102)*
Students will see a wide range of neurologic conditions in an inpatient ward setting as well as seeing consults across the hospital. Students will also participate in several outpatient clinics exclusive to the VA. Students will stay at the VA for the entire 4 week block for clinical duties by default, but have the option to take part in Nightfloat at UH. The student will act as part of a team consisting of an attending, senior neurology residents, and junior neurology residents.

Stroke Neurology (2 weeks)
*(Team room: Lerner Tower 4, to the left from elevators, immediately on the right)*
Students will see neurologic patients with primarily stroke and stroke-like conditions in an inpatient ward setting as well as seeing consults across the hospital. The student will have the opportunity to participate in the acute care of stroke patients (thrombolytics, neuro-interventional) as part of the Brain Attack Team. The student will act as part of a team consisting of an attending, fellow, senior and junior neurology residents, and junior non-neurology residents.

Neurocritical Care (2 weeks)
*(Team room: Lerner Tower 4, to the right from elevators, NSU straight ahead)*
Students will participate in the day to day care of a wide range of critically-ill neurology and neurosurgery patients in the neurologic intensive care unit. The objective is to learn how to support the whole body as it deals with an acute neurologic insult. The student will act as part of a team consisting of an attending, fellow, senior and junior neurology residents, and junior non-neurology residents.

Pediatric Neurology (2 weeks)
*(Team room: Rainbow 585, use elevators behind “perpetual ball machine”)*
Students will see a wide range of pediatric neurologic conditions in an inpatient/consult setting. Students will also participate in the outpatient pediatric neurology clinics. The student will act as part of a team consisting of an attending, fellow, senior neurology residents, and pediatric residents.

Neurosurgery (2 weeks)
*(Team room: Lerner Tower 4, to the right from elevators, just inside NSU)*
Students will see a wide range of neurosurgical conditions in an inpatient ward setting as well as seeing consults across the adult and pediatric hospitals. Students will also participate in surgical care in the operating room. The student will act as part of a team consisting of neurosurgery attendings and residents.
